Will this pandemic last forever?

Nay, never...

Because there is all the proof,  
in well grounded scientific manuscripts and reports.  
That all pandemics have a finite time,  
and then they cease to be.

Will all the questions it raises be answered?

Nay, never...

Because there is all the proof,  
In various cultures and generations through,  
That no matter how strong the jolt, people do forget,  
and all doubts cease to be.

Will all possibilities in life come to an end?

Nay, never...

Because there is all the proof,  
By ones who have truly seen it close,  
That no matter how much uncertainty there is in life,  
Each moment brings with it limitless possibilities.

Will we be able to do all that we want to do in this life time?

Nay, never...

Because we mortals have,  
Unlimited mental and limited physical capabilities.  
So accept life as it is,  
and make the most of it.

Will there ever be certainty in life?

Nay, never...

Because life is made up of  
Innumerable moments threaded together like a garland.  
And the moment this uncertainty is over,  
life will cease to be.
